

Love our clean Lac Notre-Dame & Usher water?

Help us keep it that way with these tips

It's not a bathtub or toilet – no soap, waste or pee.

- We test our water every summer & alert you if there is a problem near the property.

It's not a garden – no digging, pulling weeds, dumping ashes, fertilizer, or stirring up the bottom.

- Do cut then remove the invasive Eurasian milfoil.

There are shallow areas choked with invasive Eurasian milfoil weeds – stay clear!

- Lake Association volunteers mark those areas with buoys so you can stay out.

It's not a speedway – boat wakes increase erosion into the water.

- Let's all slow down & not make waves.

It's easy to contaminate.

Milfoil was brought in on someone's boat – we worry Zebra mussels are next.

- Wash your boat & equipment before you put in.

The Usher and Lac Notre Dame Lake Association – working together to keep our lakes healthy.
